ICAO Doc 9303 Part 3: Specifications for TD1 Size Machine Readable Official Travel Documents

Type: standard | **Date:** 2021-07-15

1. Scope and Dimensions of TD1 Documents

TD1 size machine readable cards must strictly adhere to ISO/IEC 7810 nominal dimensions: 85.60 mm in width, 53.98 mm in height, and a nominal thickness of 0.76 mm (tolerance +/- 0.08 mm). The card material must be high-durability polycarbonate (PC) or composite PET/PC capable of withstanding delamination tests up to 10 years.

2. Visual Inspection Zone (VIZ) Layout

The Visual Inspection Zone on the front side contains nominal data elements: primary identifier (surname), secondary identifier (given names), nationality, date of birth (format DD MMM YYYY), sex (M, F, or X for unspecified), document number, and date of expiry. Font must be OCR-B or high-legibility sans-serif with a minimum height of 2.0 mm.

3. Machine Readable Zone (MRZ) Structure for TD1

The TD1 MRZ consists of three lines of 30 characters each (total 90 characters), printed in OCR-B font at 10 characters per inch (pitch 2.54 mm). Line 1 contains document code (I, ID, IP, or IA), issuing state (3-letter ICAO code), and document number (9 chars + 1 check digit + optional 15 chars). Line 2 contains date of birth (YYMMDD + check digit), sex (M/F/<), date of expiry (YYMMDD + check digit), nationality (3-letter code), optional data, and composite check digit. Line 3 contains primary and secondary identifiers separated by double filler characters '<<'.
