ICAO Doc 9303 Section IV: Official Transliteration Standards for Non-Latin Scripts

Type: standard | **Date:** 2022-01-18

1. Mandatory Latin Representation in MRZ

Only basic Latin letters A-Z (without accents, diacritics, or cedillas) are permitted within the Machine Readable Zone. National characters must be transliterated strictly in accordance with the official ICAO conversion tables. Diacritical marks in the VIZ are stripped or converted (e.g. umlaut Ä becomes AE in German MRZ, Ukrainian ■ becomes SHCH).

2. Ukrainian Cyrillic to ICAO Latin Mapping

Ukrainian official travel documents use the National Transliteration Standard (Resolution No. 55): ■->A, ■->B, ■->V, ■->H, ■->G, ■->D, ■->E, ■->YE (at start of word) or E, ■->ZH, ■->Z, ■->Y, ■->I, ■->YI (start) or I, ■->Y (start) or I, ■->K, ■->L, ■->M, ■->N, ■->O, ■->P, ■->R, ■->S, ■->T, ■->U, ■->F, ■->KH, ■->TS, ■->CH, ■->SH, ■->SHCH, ■->YU (start) or IU, ■->YA (start) or IA, ■ and apostrophe are omitted.
